

Mohammad Omor Faruk

Software Engineer · Security Researcher

Bogura, Bangladesh | +880175014994 | mdomorffaruk@gmail.com | <https://mdomorffaruk.github.io>

SUMMARY

Software Engineer with 6+ years of professional experience in designing and developing production-grade web applications, backend systems, REST APIs, desktop applications, and Android solutions. Experienced in building scalable software using Node.js, React, PHP, and modern web technologies, with proven contributions to enterprise banking systems and award-winning IoT solutions. Over the past three years, I have also expanded my expertise in application security, secure software development, and vulnerability assessment, enabling me to build reliable, high-quality software with a security-first mindset.

EXPERIENCE

Software Engineer & Security Researcher · ByteTech, Bangladesh (Remote) Jan 2020 – 2026

Full-Stack Developer (2020–2023)

- Developed 10+ production web applications using React, Node.js, PHP, and REST APIs.
- Built a real-time alarm management platform for Southeast Bank Bangladesh (see Projects)
- Designed desktop applications using Electron.js for internal operational tooling
- Designed backend architecture supporting real-time monitoring across multiple banking branches.

Security Researcher (2023–2026)

- Performed web application reconnaissance, attack-surface mapping, and manual security testing
- Conducted malware analysis and reverse engineering to understand vulnerabilities.
- Built automation pipelines for subdomain enumeration, port scanning, and vulnerability triage
- Studied exploit development, buffer overflows, and kernel-level techniques (C/C++)
- Practiced OSCP coursework (PWK), PortSwigger Web Academy labs, and TryHackMe offensive rooms

Freelance Developer · Fiverr / Upwork 2019 – 2020

- Developed Java 2D games and web projects for international clients
- Earned \$700+ USD across platforms before transitioning to full-time employment

KEY PROJECTS

South-East Bank Alarm Management System - Lead Developer · 2023

- Architected a 24/7 real-time monitoring platform for banking security infrastructure
- Developed a Kotlin Android monitoring client and a PHP REST API backend
- Automated alarm workflows, reducing manual monitoring workload by 70%
- Deployed a system supporting continuous operational monitoring across bank branches.

Stack: PHP · Kotlin · MySQL · Android · REST API

Smart Helmet - AI-Powered IoT Safety Device - Award Winning Project · 2021–2022

- Developed a GPS/GSM accident alert and rider safety monitoring system
- Integrated Python and OpenCV for vehicle recognition and collision analysis
- Recognized with the Digital Bangladesh Award 2022 by the Prime Minister of Bangladesh

Stack: Python · OpenCV · GPS/GSM · Embedded Systems

VulnXposer - SaaS Vulnerability Scanner · 2024 | Final Year Project

- Built a web-based security assessment platform integrating OWASP ZAP, DNS analysis, port scanning, subdomain enumeration, HTTP header inspection, SSL/TLS checks, and real-time Socket.io updates
- Designed an automated pipeline for generating structured vulnerability assessment reports (HTML/PDF)

Stack: React · Node.js · Express · MySQL · OWASP ZAP · Nmap · github.com/mdomorffaruk/vulnxposer-web-vulnerability-scanner

Recon & Security Automation Toolkit - 2025

- Built Bash/Python automation pipelines for subdomain enumeration, archive URL collection, HTTP probing, and Nuclei scanning
- Integrated Subfinder, Amass, Httpx, Katana, Feroxbuster, and Wafw00f into unified workflows.

Stack: Bash · Python · Nuclei · Subfinder · Amass · github.com/mdomorffaruk/recon-automation

TECHNICAL SKILLS

- **Languages:** JavaScript, PHP, Python, Kotlin, C/C++, Bash, Java
- **Backend:** Node.js, Express, Laravel, Django, REST APIs
- **Frontend:** React, TypeScript, HTML5, CSS3, ElectronJS
- **Databases:** MySQL, PostgreSQL, MongoDB, SQLite
- **Cybersecurity:** Web App Penetration Testing, API Security, Recon Automation, Malware Analysis, Reverse Engineering, Buffer Overflow, Exploit Development
- **Tools:** Burp Suite, Nmap, Nuclei, Subfinder, Amass, Httpx, Katana, Feroxbuster, Ghidra, Wireshark.
- **Infrastructure:** Linux, Docker, AWS, Git, GitHub Actions, VPS

EDUCATION

- **B.Sc. in Computer Science and Engineering** 2018 – 2022 | University of Rajshahi, Bangladesh

AWARDS & RECOGNITION

- **Digital Bangladesh Award 2022** · Prime Minister of Bangladesh - Engineering Innovation (Smart Helmet)2022
- **Robotech Olympiad** · MBSTU - Excellence in Embedded Systems2023

CERTIFICATIONS & TRAINING

- **OSCP Coursework (PWK 3.2)** · Offensive Security - Completed coursework and labs (exam pending) 2024
- **Blue Team Junior Analyst (BJT)** · Security Blue Team 2023
- **NSE 1 & NSE 2 - Network Security Associate** · Fortinet 2023
- **Foundations of Cybersecurity** · Google 2023
- **OWASP Top 10** · TryHackMe 2023
- **NDG Linux Unhatched** · Cisco Networking Academy 2023
- **(ISC)² Candidate** · (ISC)² 2023

ONLINE PRESENCE

- **Portfolio:** mdomorffaruk.github.io
- **GitHub:** github.com/mdomorffaruk
- **Medium:** medium.com/@mdomorffaruk
- **Fiverr:** fiverr.com/mdofrbn7
